

Resonance

RESONANCE STUDIO · CONCEPT · INDOOR IMMERSIVE

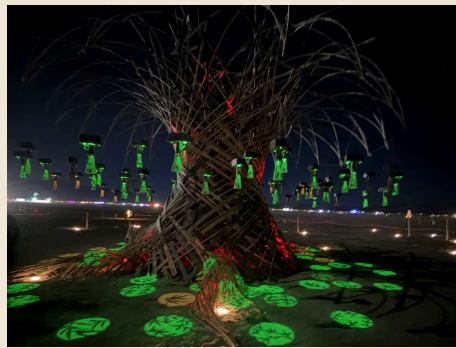

The Resonance Forest

Several bamboo trees at different scales, joined by bridges, tunnels and nets, under projected skies that change through the day.

1 CLIMB

Move through it on foot and by hand. Trunks to climb, nets to rest in, bridges between the crowns.

2 LIGHT

By day the light shows the weave and the material. By night, projection carries the room from a Joshua Tree sky to the Sahara to a rainforest.

3 STORIES

An evolving platform for projection artists, scientists and cultural partners. New environments, new stories, the same living structure.

CONCEPT SHEET · REFERENCE IMAGERY FROM THE 2026
RESONANCE TREE

A warehouse-scale forest you can climb
into, built from bamboo and light.

resonanceart.org/gallery

Design in progress. Renders of the Forest will replace the reference photographs.
